

European Health Data Space

Conférence luxembourgeoise sur la documentation et classification des séjours hospitaliers, 22/02/23

*Marco Marsella, Head of Unit
CNECT.H3 eHealth, well-being and ageing
European Commission*

Digital technologies driving innovation in health

Across the care pathway

- ✓ Citizen empowerment through access to own health data
- ✓ mHealth apps
- ✓ COVID-19 contact tracing apps / EU Digital COVID-19 Certificate

- ✓ Diagnostic tools and AI applications
- ✓ Robotics
- ✓ 1+ Million Genomes Initiative
- ✓ European Cancer Imaging Initiative
- ✓ Virtual twins

- ✓ Virtual twins
- ✓ AI and data analytics solutions for clinical research and decision making
- ✓ Robotics
- ✓ mHealth Apps

- ✓ AI solutions to monitor health status and quality of life after treatment

➤ **Societal impact – cost efficiencies – long healthy lives – personalised care – patient empowerment**

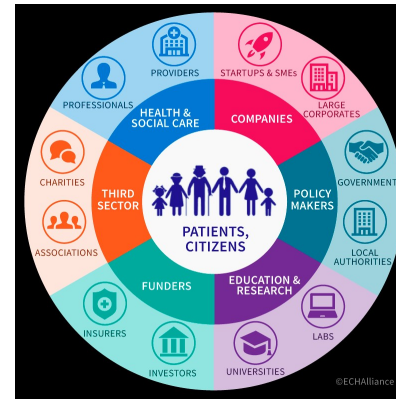

Transformative Digital Health Technologies

Legal
Framework &
Policies

The European data strategy to make the European Union a leader in a data-driven society

The European Strategy for data at a glance

The **European Strategy for data** (2020) aims to make the EU a leader in a data-driven society.

The **Data Governance Act** (2020) facilitates data sharing across sectors and Member States.

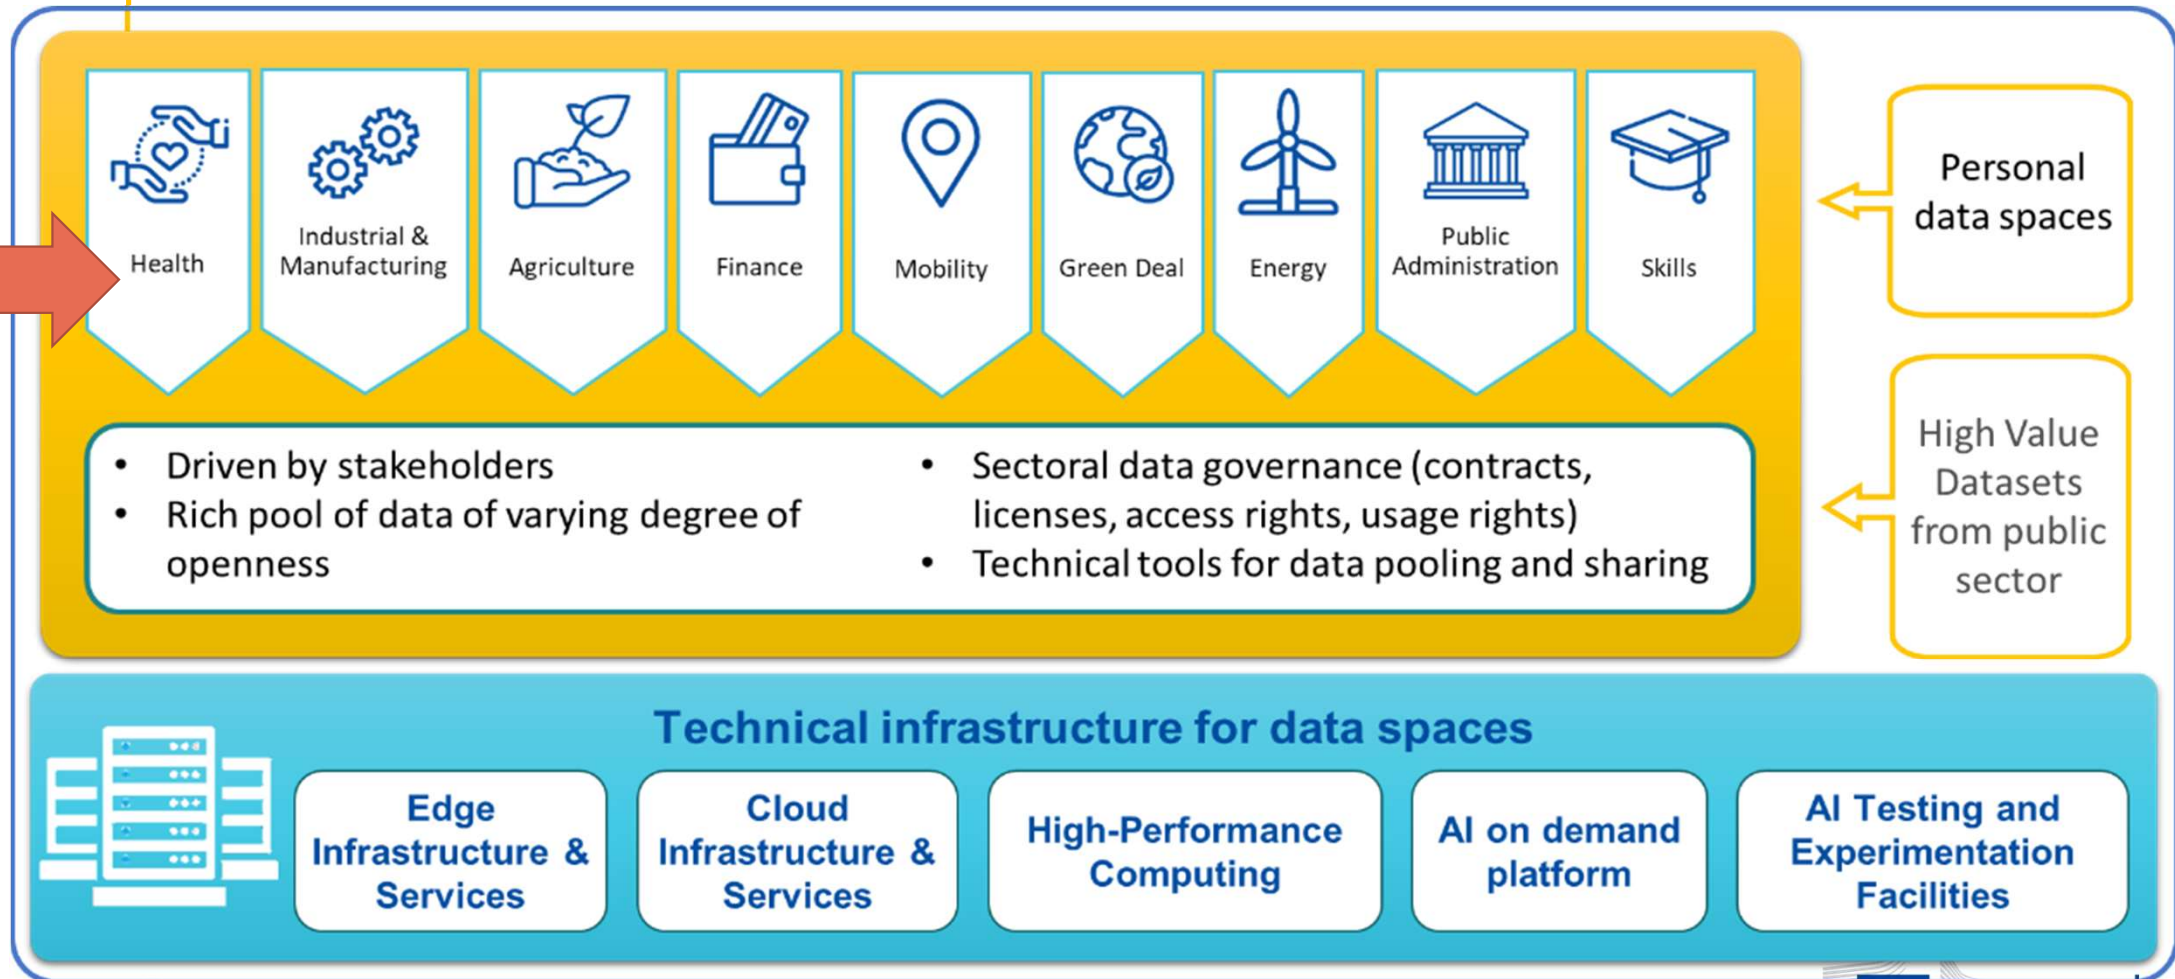

The **Data Act** (2022) clarifies who can create value from data.

Ten **European common data spaces**, ranging from industry to mobility, from European Green Deal to energy and health.

Common European Data Spaces, including for Health

Proposal for a Regulation on the European Health Data Space

It sets out rules, common standards, infrastructures and a governance framework for the use of electronic health data for healthcare, research, innovation and policy making

Empower individuals to access and control their personal health data

Ensure a consistent framework for the use of individuals' health data for research, innovation, policy-making and regulatory activities

Unleash the data economy by fostering a genuine single market for digital health services and products (EHR systems)

European Health Data Space (EHDS)

OBJECTIVES

Effective use of health data

SCOPE & EXPECTED IMPACT

MEANS

The scope of EHDS (*Article 1*)

Strengthens the rights of individuals in relation to greater control over their electronic health data:

access in electronic form immediately, without any cost; *to share* their data with health professionals nationally or cross-border; *to add* information, *rectify* errors, *restrict* access and *obtain* information on what health professional accessed their data, *a right* to health data issued and accepted *in a common European format*, to strengthen interoperability. Designation of digital health authorities, to uphold the rights

Rules for electronic health record systems

- Mandatory requirements for interoperability and security + CE marking

Rules and mechanisms supporting the secondary use of electronic health data

- Legal base for data made accessible
- Provisions for compulsory health data sharing
- Designation of health data access bodies

Mandatory cross-border infrastructure for primary and secondary use of health data

- cross-border digital infrastructure for the exchange of health data **MyHealth@EU**
- **new decentralised EU-infrastructure** for secondary use (**HealthData@EU**)

EHDS – benefits for users

Empower citizens to have control over their health data

Better diagnosis and treatment, improved patient safety, continuity of care and improved healthcare efficiency

Health data from apps and medical devices

Assist policy makers and regulators in accessing relevant health data

Facilitate access to health data for innovators in industry

Better health policy, greater opportunities for research and innovation

Health data in registries

Grant access to health data for researchers

Enable healthcare professionals to have access to relevant health data

EHDS – links with other legal proposals and initiatives

GDPR

EHDS builds upon GDPR rights and further develops some of them

European Health Union

EHDS will boost the work of EU Cancer plan, HERA, Pharmaceutical Strategy for Europe

Data Governance Act, Data act

EHDS complements and provides more tailor-made rules for the health sector

EU cybersecurity framework (NIS directive)

EHDS complements and provides more tailor-made rules for the health sector

AI Act

EHDS supports and complements training of AI, interoperability of AI and EHR systems and data quality

Medical Device Regulation

If manufacturers claim interoperability of devices with EHR systems –EHDS requirements apply

Cross-border Infrastructure & Ecosystems

MyHealth@EU: Cross-border infrastructure for healthcare provision

My Health @ EU
eHealth Digital Service Infrastructure
A service provided by the European Union

Doctor access to foreign citizen Patient Summary

Patient Summary

Used while traveling abroad and being in necessity of consulting a doctor in that country.

Provides information on important health related aspects such as your allergies, current medication, previous illness, surgeries.

Helps doctors to formulate an adequate treatment, avoid some possible risk (for instance in case of allergy) and overcome linguistic barriers.

[eHealth Network Patient Summary guidelines, including minimum dataset](#)

MyHealth@EU: Cross-border infrastructure for healthcare provision

My Health @ EU
eHealth Digital Service Infrastructure
A service provided by the European Union

Patients access to ePrescriptions abroad

Electronic prescription in Europe – a Finnish patient purchasing medication in a pharmacy abroad

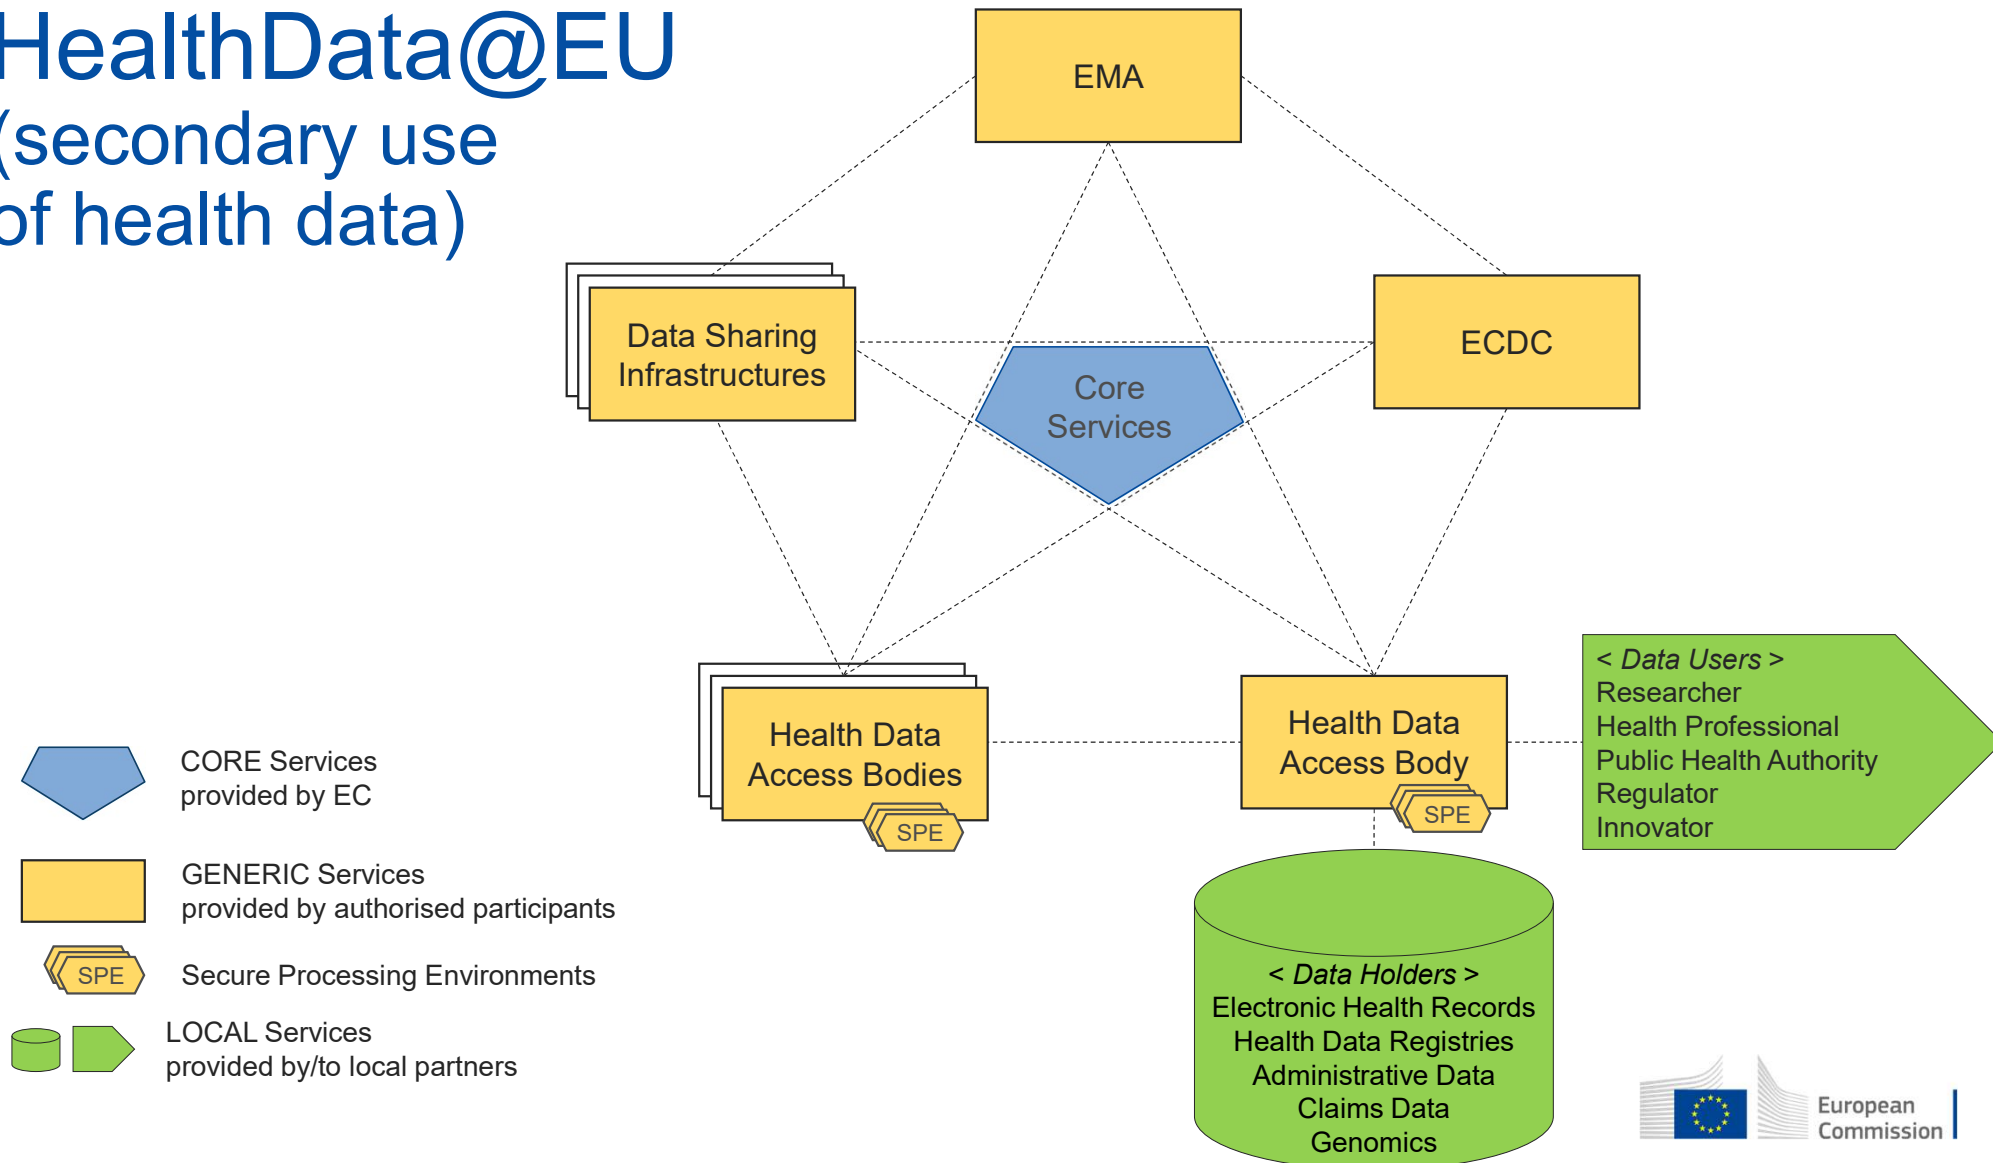

ePrescription

allows citizens in Europe to retrieve their medication in a pharmacy located in another European country without having to bring the printed prescription and without being concerned about the language barrier.

[eHealth Network ePrescriptions and eDispensation guidelines](#)

HealthData@EU

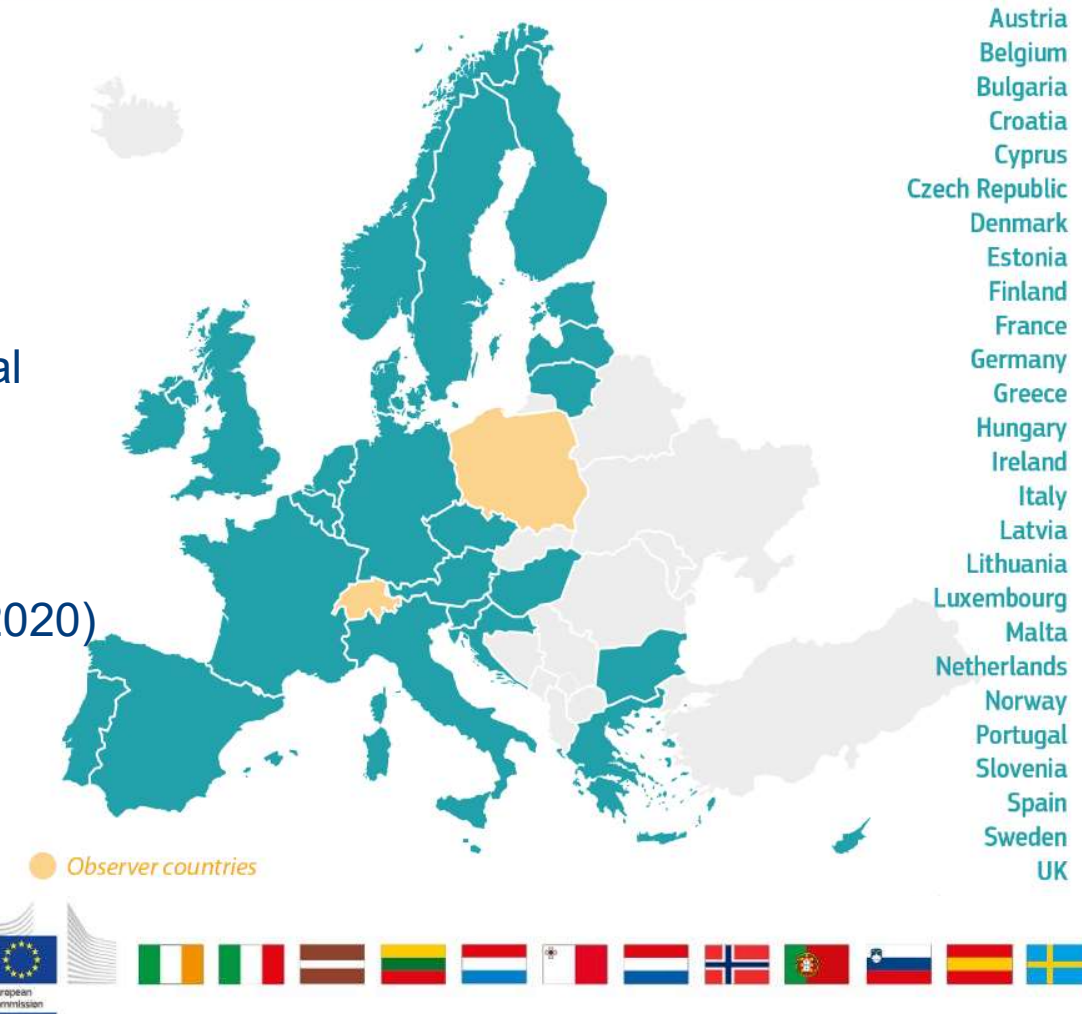

(secondary use of health data)

1+ Million Genomes EU initiative (1+MG)

- 2018 Member States' Declaration signed by 26 countries by now
- For research, healthcare and public health
- Strategic overview: 1+MG Group (governmental representatives)
- Expert work: 12 working groups
- Coordination support via the B1MG project (H2020)
- Data infrastructure via the GDI project (DEP)
- Genome of Europe – coordinated sequencing

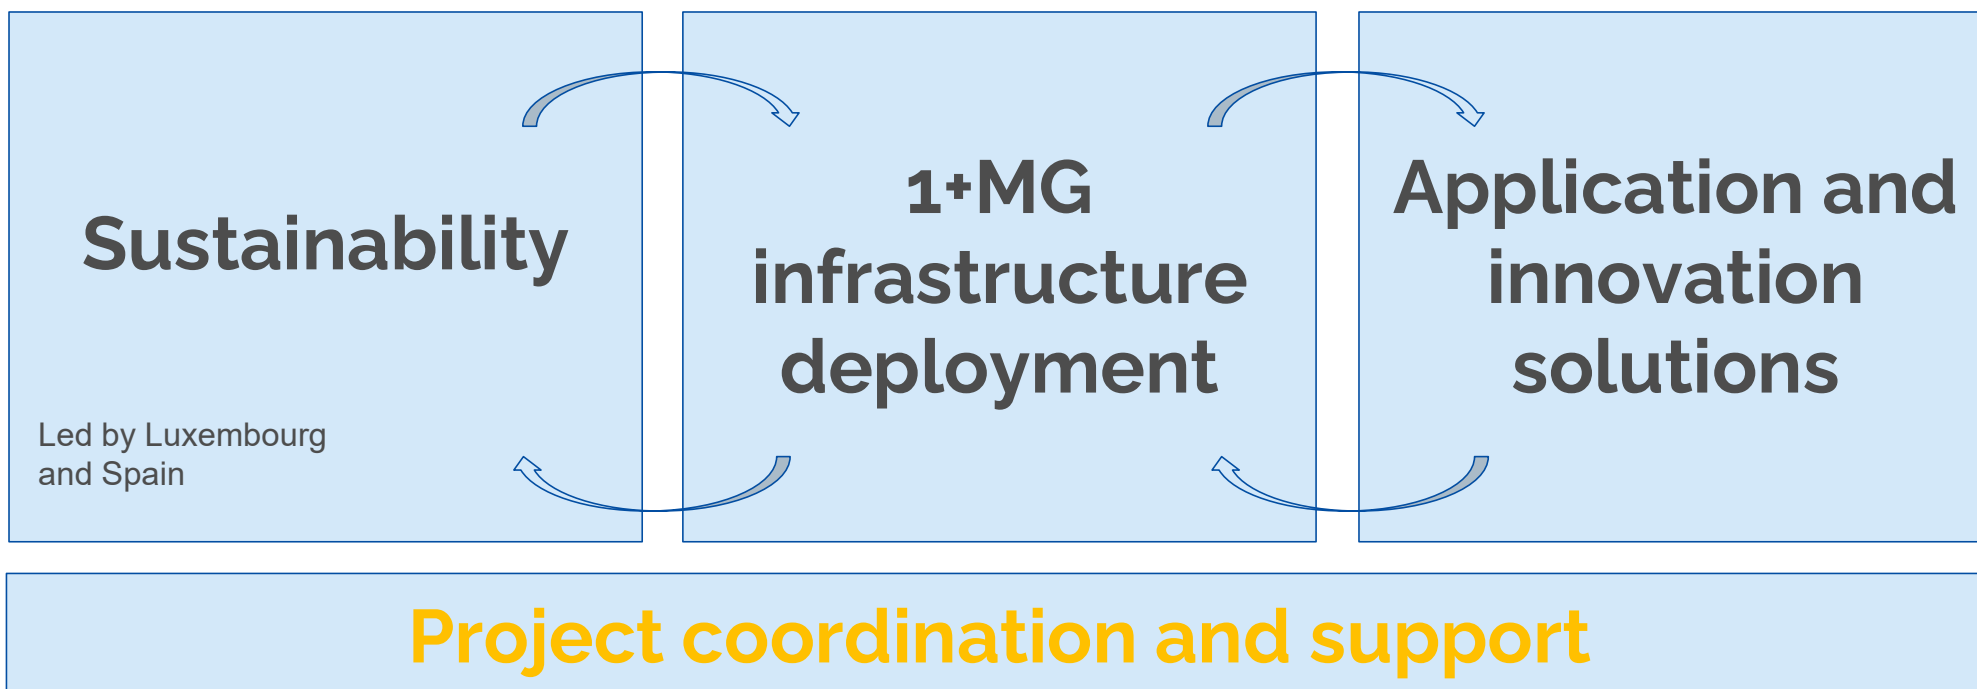

Countries that have signed the 1+MG Declaration since 2018

European Genomic Data Infrastructure

- 54 beneficiaries: 20 Member States, 2 research infrastructures
- coordination: EMBL/Elixir
- 6 national nodes operational by 2024, 9 more by 2026
- numerous other projects linked in

➤ Plateforme nationale d'échange des données (PNED) – *beneficiary*

➤ Ministry of Research – *associated partner*

the European Union

EUROPEAN CANCER IMAGING INITIATIVE

An EU state of the art platform to support the piloting and development of new computer-aided tools to improve personalised medicine and innovative solutions, demonstrating the power of Artificial Intelligence and digital technologies to beat cancer

Vision and Mission of this Initiative

Deploy a pan-European **federated infrastructure** to power up AI & Imaging to beat cancer

Provide a **Research Platform** for the development & benchmarking of AI tools toward Precision Medicine

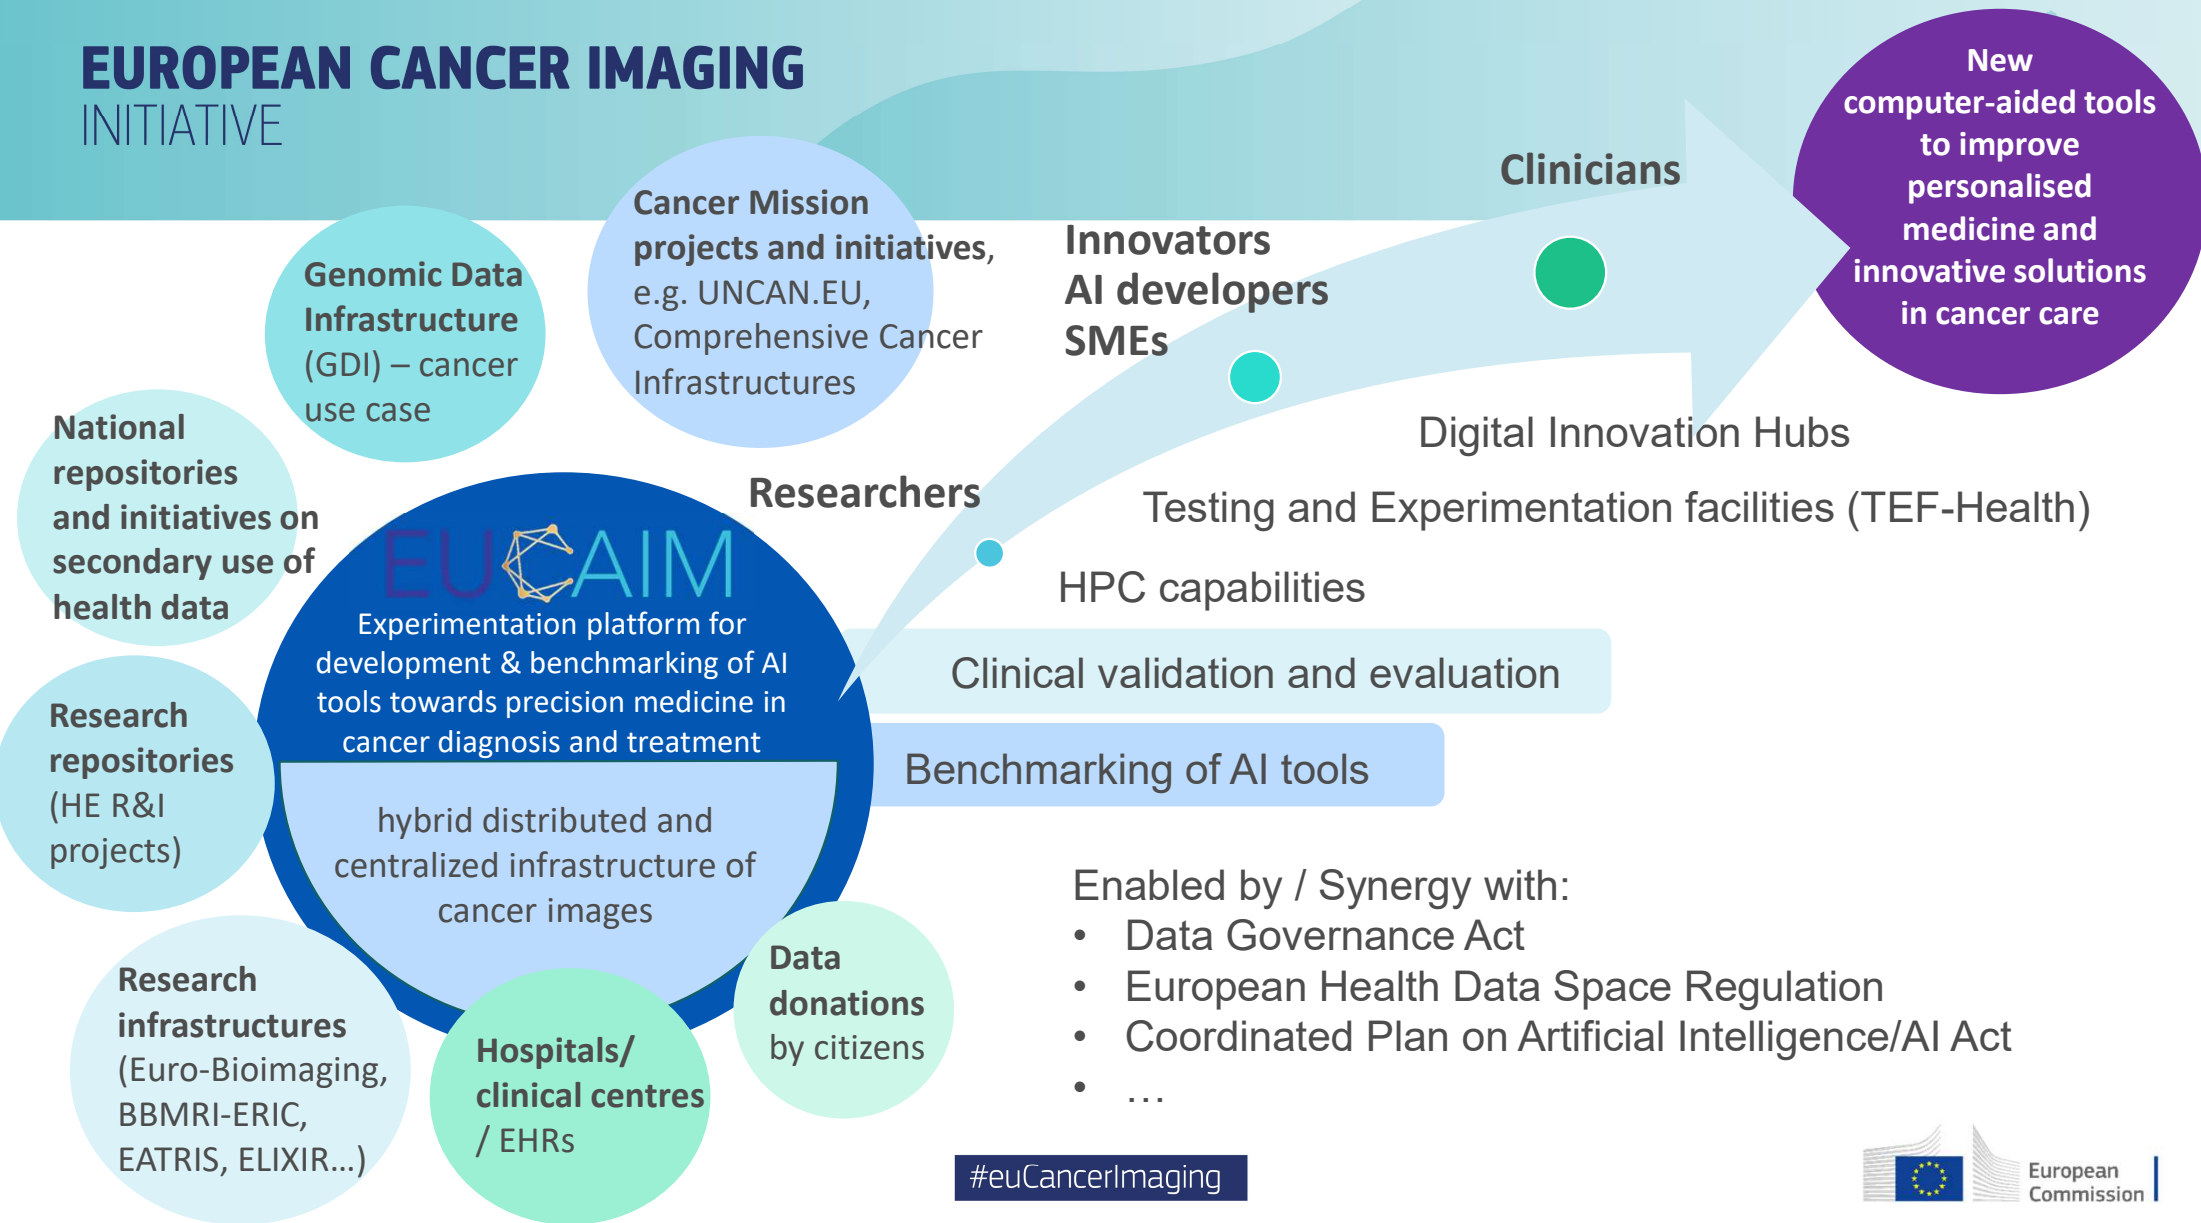

Address the fragmentation of the existing cancer image repositories by building a **distributed Atlas of Cancer Images** (>60M cancer images)

Create a **Federated Datawarehouse** approach for deploying Observational Studies and populate the centralized Image Repository

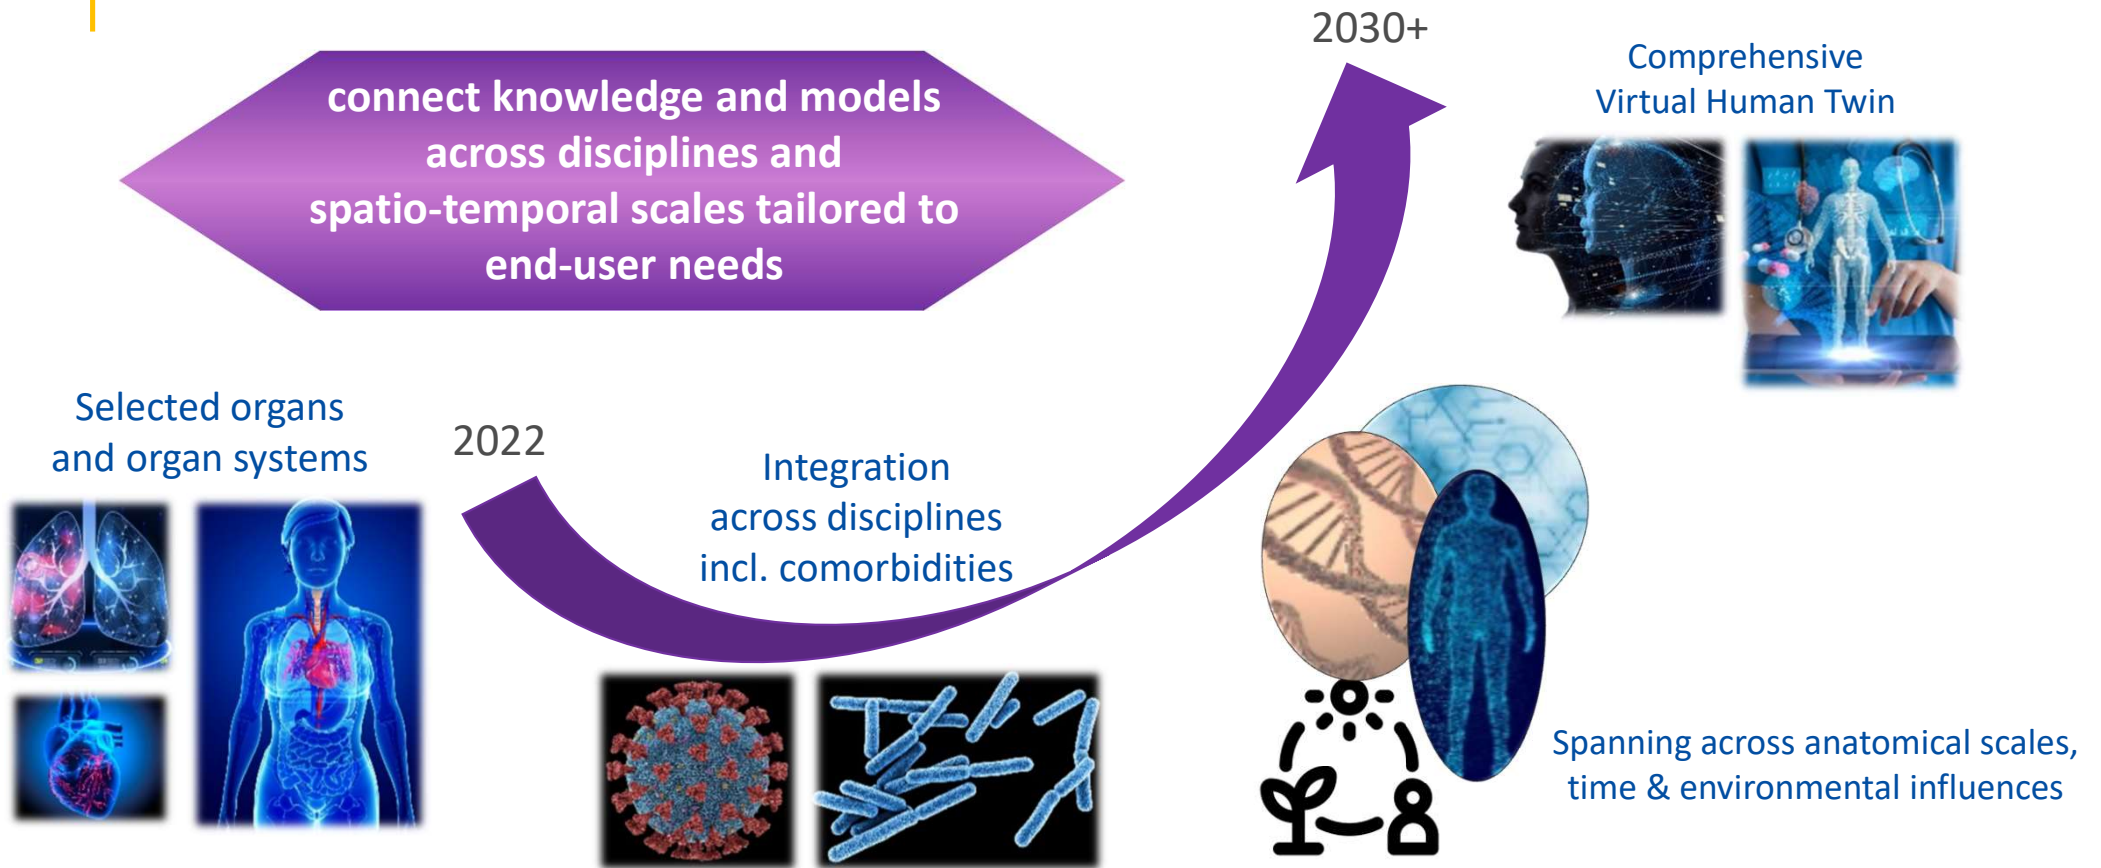

#euCancerImaging

EUROPEAN CANCER IMAGING INITIATIVE

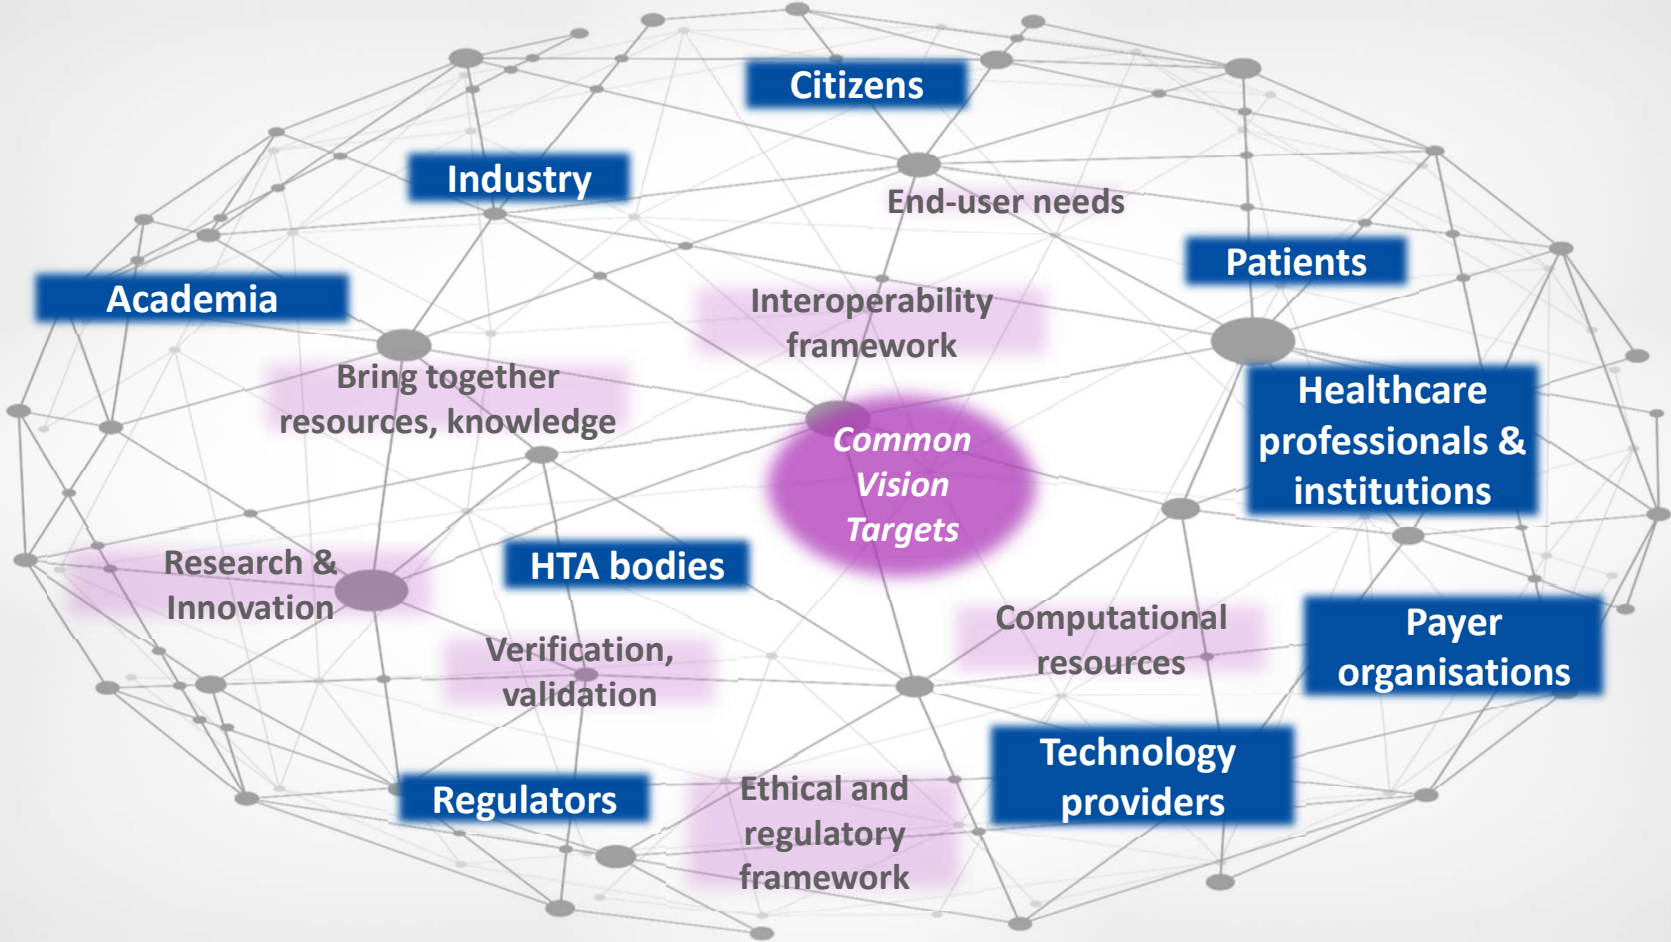

#euCancerImaging

Towards Virtual Twin(s) of the human

An inclusive ecosystem
